Earning Criteria

[Completion of the AWS Academy Cloud Foundations course.](#)

Occupations

Cloud Engineers

Assist in the migration of data and services from physical IT infrastructure to virtual environments. Conduct tests and troubleshooting activities to ensure a smooth transition and continued customer satisfaction thereafter.

Learn More

ICT Consultants

Advise on how to optimize the use of existing tools and systems, make recommendations for the development and implementation of business projects or technological solutions, and contribute to project definitions. Raise awareness of IT innovations and their potential value to a business, and participate in the assessment and selection of solutions.

Learn More

IT Infrastructure Services Analysts

Develop, test, operate, monitor, manage, and/or support IT services using a collection of hardware, software, networks, data centers, facilities, and related equipment.

Learn More

Technology Implementation Consultants

Manage end-to-end technology project implementation for clients. Understand client requirements, generate solutions, configure software, and conduct end-user training. Ensure smooth product adoption.

Learn More

Software Application Developers

Develop, create, and modify general computer applications software or specialized utility programs. Analyze user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing operational efficiency. May analyze and design databases within an application area, working individually or coordinating database development as part of a team. May coordinate computer programmers.
