SUMMARY

Full-stack developer with hands-on experience in building and maintaining production web applications using TypeScript, React, Node.js, and PostgreSQL. I have been able to work on platforms that are used by thousands of users, developing authentication systems, backend APIs, and operational dashboards. Comfortable in working across the stack – from backend logic and database design to frontend implementation.

TECHNICAL SKILLS

Core Technologies

TypeScript, JavaScript, Node.js, React, Next.js, REST API Development

Backend Development

Authentication & Authorization (JWT, NextAuth), Ruby on Rails, Firebase Cloud Functions, Python

Databases

PostgreSQL, MySQL, Firebase Firestore, Supabase

Tools and Workflow

Git, GitHub, Agile/Scrum, VS Code, Vercel, Firebase Hosting

RELEVANT EXPERIENCE

- **Optrizo Digital Solutions** — Full Stack Developer | March 2025 – October 2025
 - Investigated and resolved issues affecting frontend components, backend APIs, and database interactions
 - Fixed data flow and API integration problems that caused UI inconsistencies
 - Improved application stability by identifying and addressing cross-stack defects
 - Collaborated with developers to diagnose and resolve production issues across the system
- **Digiteer Software Studio** — Software Engineer (Intern) | September 2024 – December 2024
 - Contributed to both backend and frontend development for internal and client-facing applications.
 - Fixed and enhanced UI bugs using modern JavaScript frameworks, improving usability and layout consistency.
 - Worked with backend APIs to support frontend features and data flows.
 - Collaborated with senior engineers to debug issues across the full application stack.
 - Gained hands-on experience with real-world development workflows, version control, and issue tracking.

SELECTED TECHNICAL PROJECTS

- **NexSkill Learning Portal** — Full Stack Developer | December 2025 - January 2026
 - Developed a prototype learning platform designed to simulate a multi-skill education portal similar to modern LMS platforms, supporting structured courses, progress tracking, and student engagement features.
 - Designed a role-based application structure supporting multiple user types (students, instructors, coaches, administrators, org owners) to model real-world platform workflows.
 - Designed interactive learning experiences including course enrollment, lesson progression, quizzes, and progress analytics through a modular dashboard interface.
 - Integrated AI-assisted learning tools to generate personalized study recommendations, milestone reminders, and simplified lesson explanations.
 - Implemented community and coaching features enabling discussion boards, peer interaction, and 1-on-1 session scheduling through calendar-based booking workflows.
 - Developed certificate issuance and verification flows allowing users to download achievements and validate credentials through a public verification mechanism.
- **Barangay Fairview E-Governance Portal** — Full Stack Developer | September 2024 - November 2025
 - Developed a full-stack e-governance platform used to manage resident records, document requests, and incident reports for a barangay serving thousands of residents.
 - Designed and implemented backend APIs and database schemas supporting document requests, incident reporting, and resident records.
 - Built role-based authentication and authorization workflows for administrative staff and system users.
 - Developed dashboards, reporting modules, and data management tools to improve operational efficiency.
 - Integrated frontend interfaces with backend services using React, TypeScript, and REST APIs.
 - Implemented validation, notifications, and workflow automation to support reliable record handling and service processing.
- **Hakum Auto Care Services Platform** — Full Stack Developer | March 2025 – October 2025
(Landing Page: <https://www.hakumautocare.com>)
 - Developed and maintained frontend and backend features supporting booking, scheduling, and customer workflows.
 - Implemented backend logic and APIs to support core platform functionality.
 - Built and refined frontend components to improve usability and user experience.
 - Performed functional, API, and UI/UX testing to improve platform stability and reliability.
 - Identified, fixed, and documented 30+ issues across both frontend UI and backend logic.
 - Collaborated with developers to resolve cross-stack issues and deploy fixes.
 - Provided UI/UX and SEO improvements to enhance user engagement and discoverability.
- **Mayor Javi Benitez Public Information Website** — Software Engineer (Intern) | September 2024 – December 2024
 - Designed and developed a complete end-to-end module for a public communication platform reaching thousands of constituents using React, TypeScript, Ruby on Rails, and PostgreSQL across the full application stack.
 - Built backend APIs supporting announcements, advisories, and content management features for a platform reaching ~85,000 constituents.
 - Implemented and integrated frontend UI components based on an existing design pattern for consistency.
 - Automated dissemination of announcements through web UI, SMS, and email channels.
 - Ensured data consistency and reliability through proper handling and validation.

EDUCATION

De La Salle University - Manila | August 2020 – February 2026
Bachelor of Science in Information Technology, Minor in Psychology
Graduating February 2026

Colegio de San Juan de Letrán | 2018 – 2020
STEM Strand

CERTIFICATIONS

DFIR Foundations and Techniques Course
Blue Cape Security
Issued Jul 2025
